## Chelated Mineral Supplement

New Generation of Companion Animals Feed Supplements

Cats & Dogs

### Cats & Dogs; Popular Companion Animals

Cats & dogs are amongst the most popular pets in the world. According to the latest statistics, 470 million dogs and 370 million cats are kept in houses as pets.

### Companion Animals Feed Supplements & Additives

Feed supplements and additives are an inseparable part of companion animals' diet. Although micronutrients account for less than 0.01% of body mass, they are vital for the normal function of biological systems, this is why they are widely used as one of the most important feed supplements. Mineral (inorganic) salts are commonly used to meet the needs of companion animals for micronutrients, yet owing to the low absorption rate of these compounds, often high doses should be added to their diet. Organic sources of mineral elements, such as chelates (mostly having amino acid-based structures), usually demonstrate higher rate of absorption than inorganic structures; however, one major obstacle to the wider consumption of the available organic supplements is their low cost-effectiveness.

### Bonzapet Supplement; Companion Animals Specific

Relying on the results of various research proven, scientific studies and experiments and also in view of the market need, Sodour Ahrar Shargh Knowledge-based Company has manufactured a unique product named "Bonzapet" supplement as a new generation of companion animals supplements. The technology used in the production of this supplement is patented in Iran Patent Center & the United States Patent and Trademark Office (USPTO) and is filed in the European Patent Office (EPO) as well. This supplement contains the nutrients of copper, zinc, selenium, iron, chromium, cobalt, manganese, phosphorus, calcium, potassium, iodine and magnesium in chelated form and guaranteed doses.

Supplementing companion animals' diet with Bonzapet supplement improves growth, health & freshness and reduces the incidence of infectious & digestive diseases as well as the need for medications & antibiotics.

### Key Points

- ✓ Bonzapet supplement can be mixed with feed/concentrate, or dissolved in water/milk.
- ✓ Bonzapet supplement is used as an additive in diets on a daily basis according to the specified doses.
- ✓ Do not use other organic micronutrient supplements (such as amino acid, peptide, hydroxy analogue, polysaccharide or yeast-based chelates) along with Bonzapet supplement in diets.
- ✓ Bonzapet supplement is packaged in 100-g packets (containing two hundred 0.5g sachets). The expiration date is 2 years after production.
- ✓ Bonzapet supplement must be kept out of reach of children, away from direct sunlight, in a dry place, at room temperature and in the original container.

### Direction for Use

#### Daily Dose of Bonzapet Supplement Per Dog or Cat According to Their Weight

Under 20kg	20 - 40kg	Above 40kg
0.5g	1g	1.5g

### Bonzapet Analysis

Chromium	Selenium	Manganese	Copper	Zinc	Iron
10	20	500	300	4000	4000
Phosphorus	Potassium	Calcium	Magnesium	Iodine	Cobalt
24000	100000	60000	5000	100	10

ppm in chelated form
